---	--	---

Important considerations:

- This is not a “Transportation Only”, “in home” or “medical appointment” service. While door to door transportation is provided the service is wrapped around providing HPC community based staffing for recreational and life experiences. We cannot provide staffing for medical appointments or health related outings. We do not provide any services at a personal residence.
- Client agrees to pay all associated expenses for staff. This includes entry fees (ex: movie tickets) and meals (up to \$6 at fast food and \$10 at table service restaurants). Clients cannot book if a past balance is due for staff expenses.
- Minimum booking time is two hours but up to 8. Exceptions for longer periods can be considered for day long trips. (ex: Visiting a theme park)
- Client assessment will be conducted in advance of service offering to ensure our staff are able to manage all care needs. Not every client will be able to access this service.
- Client must agree to terms of service that cover booking windows, cancelation policies, no call/no show and more. A copy is provided with the intake application and online.
- Client, CICL and the SSA must agree in advance on available hours and miles needed to access this service.

Fun-One (Suggested name) Name suggests a fun activity that is oriented to the desires of "one" person as opposed to a group outing.

Goal: To develop a flexible service model capable of promoting personalized access to the community for individuals with Developmental Disabilities.

How: Provide concierge type staffing services to access the community for personal enrichment. Allow the client to direct program outcomes by determining when and where services are offered.

Program Considerations:

- * Use an online booking service to schedule/reserve services. Think of how the "Great Clips" or "Uber" app works. We are testing an app <https://squareup.com/appointments/book/Q8AAW7/fun-one-choices-in-community-living> IN ADDITION we could hire a client to take calls and book reservations for those without internet or cell phone access.
- * Since this is a community access program "in-home" services would not be offered. Should not be used for medical appointment staffing.
- * Offered to CICL clients, other agency clients and individuals living alone or at home with family. (Level 1 waivers)
- * We would want to accept all HPC. Level 1 would be an outreach to people living alone or with family. A great way to introduce our agency to people who may be looking for placements down the road.

Staffing:

- We look to hire a person with developmental disability to manage the call center for this service. The call center will allow those without internet access or a smart phone to access the service.
- HPC staff will be solicited from current available agency employees. Those selected can provide an availability schedule that is populated on the booking service. Staff cannot provide a schedule that could take them into overtime.
- Staff must have email and a smart phone to manage their bookings.
- Staff must have clean, reliable transportation and agree to use it when providing this service.
